

In 2023, one developer
posted a side project on
GitHub.

Two years later, it was worth **\$6.6 billion**.

This is the story of Lovable.dev — and the one flaw that could end it.

Fastest. Software Company. Ever.

\$0

Starting ARR

A side project. No funding. No team.

\$75M

Year One

Word of mouth. Zero ads. Pure momentum.

\$100M

8 Months Later

OpenAI took longer to hit this milestone.

\$6.6B

Valuation

Europe's most valuable AI startup. Overnight.

✨ THE MAGIC TRICK

They didn't build a tool. They erased a requirement.

✗ Before Lovable

3 months. \$50,000. A developer you don't have.

Frustrated. Blocked. Waiting.

✓ After Lovable

30 minutes. \$25. Just describe your idea.

Full app. Live. In production.

98 Million Visits. Zero Ads.

Global AI Tool Ranking
Among every AI product on Earth.

This is what a real brand looks like.

⚠ THE TWIST

But here's what nobody is saying out loud.

8,000,000 Total users who tried Lovable	180,000 Actually paying for it
Sub 3% Conversion rate	

97 out of every 100 people who try this... walk away. 🚪

And somebody noticed the gap first.

Emergent AI — Bengaluru

Ex-Googlers. \$70M raised. Built for India's 500M developers. They're not competing on features — they're competing on **access**.

India Traffic Down 19%

Right now. While you read this.

Local Pricing

₹999/month. Lovable charges 4× more.

Every weakness has a name.

Bug Loops

Kills 65–75% of power users. The AI fixes one thing, breaks two more.
Users rage-quit.

Hidden Pricing

Users can't see the cost until they're committed. Trust evaporates at checkout.

Broken GitHub Sync

Developers can't trust it for real work.
One failed push and the project is dead.

Each one is small. Together, they're the leak.

Here's the fix. All four, in motion.

01

Smart Rollback

Stop charging for broken fixes. Auto-revert when quality drops.

02

Price Preview

Show the cost before they commit. Transparency converts.

03

GitHub Sync v2

Earn developer trust back. Make it reliable enough for production.

04

₹999 India Pricing

Beat Emergent before they win. Own the market, not just the mindshare.

None of these are hard. All of them are urgent.

This isn't a product anymore.

It's six layers deep. Walking away costs more every day you stay.

AI Generation

Idea to app in seconds

Database Layer

Built-in, auto-scaled

One-Click Deploy

GitHub Sync

Version control built in

Team Collaboration

Real-time co-building

App Marketplace

Templates, plugins, ecosystem

Lovable doesn't have a product problem. It has a conversion problem.

Fixing it is the difference between **\$200M** and **\$2 billion**.
